Abstract (en)
[origin: EP0464348A2] The invention relates to a cutting tool for superfinish treatment, having an adjusting holder carrying a tool-material element and a location part carrying the adjusting holder. To improve the surface quality of superfinished surfaces, provision is made for the adjusting holder (5) to be held on the location part (3) in such a way that it can be pivoted about an axis (27) which runs essentially in the tool plane containing the rake angle.
