Abstract (en)

[origin: EP0464484A2] A switch lever (1) for electromechanical timer switches, which, acted upon by the programmed switching cams (22) of the switching riders (5) on a circulating timing disc (6), or manually, switches an electric switch (13) on, off or over indirectly via a switching star (12), is provided at one end with a latch switching mechanism consisting of two mutually adjacently arranged switching latches (7 and 8), which is integrally connected to the switch lever (1) via an elastic web (16) acting in the manner of a hinge. <IMAGE>
