Abstract (en)

[origin: EP0466345A1] A jet printing ink composition includes aqueous resin dispersion and an aqueous colourant, and is substantially free of volatile organic compounds. Compositions are provided that form printed images that, without curing, are solvent washable with isopropanol, ethanol, water, and mixtures thereof, and are retortable, without curing. Ink jet compositions capable of forming coloured images capable of being washed with isopropanol, ethanol, water, and mixtures thereof, after curing, are also provided. Finally, jet printing inks capable of withstanding washing with strong organic solvents, such as methylethylketone and methanol, after curing, are also provided.
