Abstract (en)
The invention relates to a terminal strip (R) for a mixed hot water central heating boiler. This strip comprises four modules (A, B, C, D) made of hard moulded plastic material, which are assembled side by side by mutual juxtaposition and passage of tie rods, which modules are assigned respectively to the outlet of the heating water, to the outlet of the hot service water, to the inlet of cold water and to the return of the heating water and each comprising the relevant pipes and taps as well as sections of duct (26, 31, 38, 46) making it possible to form together a short circuit on the heating circuit, which can be used for supplying this circuit with water and for impermeability tests in the absence of the boiler. <IMAGE>

Abstract (fr)
Il s'agit d'une barrette de raccordement (R) pour chaudière mixte de chauffage central à eau chaude. Cette barrette comprend quatre modules (A,B,C,D) en matière plastique dure moulée assemblés côte à côte par juxtaposition mutuelle et traversée de tirants, modules affectés respectivement au départ de l'eau de chauffage, au départ de l'eau chaude sanitaire, à l'arrivée d'eau froide et au retour de l'eau de chauffage et comprenant chacun les conduits et robinets concernés ainsi que des tronçons de conduite (26,31,38,46) permettant de former ensemble un court-circuit sur le circuit de chauffage, utilisable pour l'alimentation de ce circuit en eau et pour des essais d'étanchéité en absence de la chaudière.
