Abstract (en)

[origin: EP0466656A1] The bracelet fastener according to the invention comprises a first piece (1) consisting of a base plate (10) beneath one or more posts (11, 12), the said first piece being inserted in one or more holes (32, 33) in the two superposed bracelet sides (30, 31), and a second tubular piece (2) surrounding the two bracelet sides (30, 31) and whose upper face (20) is equipped with a longitudinal slot (21) in which a notch (23) is intended to receive the end of a post (12). <??>The fastener system according to the invention has the advantage of simplifying the manufacture of the bracelet and preventing any wear or damage to the said bracelet during use. <IMAGE>
