Abstract (en)
[origin: WO9013097A1] A coin handling apparatus having a passageway in which coins travel, and an impact element (10) secured to a part (4) of the apparatus in a position where it will be struck by a travelling coin so as to reduce the kinetic energy of the coin, characterised in that the impact element has a securing portion (38) around which plastics material, of which said part is made, has been moulded to secure the impact element.
