Abstract (en)
[origin: EP0467679A1] A method and apparatus is provided for sealing chimneys. The apparatus comprises a spray device 16 positionable within a chimney 10, and operable to spray sealant from the spray device onto the internal walls of the chimney, there being means 15, 18 for moving the spray device along at least a part of the length of the chimney. There is a sealant feed pipe 15 which provides sealant to a spray head and can also be used to lower the device down a chimney. The device is guided and centralised by a sledge 18 which may be fitted with wheels and may be adjustable to suit different diameters of chimney. <IMAGE>
