Abstract (en)

[origin: EP0468081A1] In order to specify a spraygun for high-pressure cleaning with integrated pump, integrated drive, handle and feed lines for the cleaning fluid and if appropriate for the drive energy, which is of simple design, can be easily assembled and which can be easily equipped for very different, in particular also for new, unforeseeable applications, it is proposed that the functional units of the spraygun be constructed as a module.
