Abstract (en)
[origin: EP0468222A1] The invention relates to a bascule lock for doors with sections of a foam-filled door leaf which are connected to one another in an articulated manner. To guarantee a foam filling of the door leaf and also to make it possible to arrange the handle parts in a countersunk manner, by means of the invention the bolts located on the outside and the locking bars (16) located in the lock case (6) are connected via a compression-resistant and tension-resistant chain (14) which is arranged in a foam-inserted square tube (13). <IMAGE>
