Abstract (en)

An expandable bag (10) adapted to be expanded in an expansion direction by the introduction of fluid into the bag (10) under a pressure greater than the pressure externally of the bag (10), the bag (10) comprising a plurality of compartments (11-20) each being generally of loop configuration (as herein defined), each compartment (11-20) having at least in part, flexible walls (11a,11b), there being passage means (35,36,50,53,54,58) to permit fluid introduced into the bag (10) at one end thereof, to flow into each of the compartments (11-20). <IMAGE>
