Abstract (en)
[origin: EP0468704A1] A motor vehicle headlamp assembly has a reflector body (10) with a rear bulb-receiving aperture (14) surrounded by an external sleeve (16). A bulb-retaining pressing (34) is anchored to the sleeve (16) and includes a ring (36) having slots (48) in its inner periphery to enable the passage of mounting lugs (24) on a flange of the bulb. The mounting lugs (24) are urged by spring arms 42 on the ring (36) against respective abutment surfaces (22,23) in the sleeve (16). The abutment surfaces (22,23) are peripherally spaced from the respective slots (48) and are disposed between respective stops (26) and ramp surfaces (30,32) on the pressing (34). <IMAGE>
