Abstract (en)
A suspended ceiling system in which a two part ceiling tile (1) is suspended from an overhead grid system (2). The tile comprises a main portion (1A) and a secondary tile portion (1B) which is removably mounted in a central aperture (3) in the main tile portion (1A). The secondary tile portion (1B) includes delineating means in the form of a groove (23) surrounding an inner area (6) which can provide a decorative feature for the ceiling tile or the inner area 6 can be omitted or removed to facilitate adaptation of the secondary tile portion to mount auxiliary services thereon such as lighting systems, sprinkler systems, public address system etc. <IMAGE>
