Abstract (en)

[origin: EP0468867A1] The invention relates to a drying equipment comprising a battery of radiant burners, a suction hood (2), and a blowing hood (3) that is intended to dry a material as it travels past, especially paper, and is equipped with a fire-prevention system integrated into its hooding. <??>This prevention system consists of a spraying boom (7) emitting a stream of steam and then a mixture of steam and water in order to lower the temperature of the latter. <IMAGE>
