Abstract (en)
[origin: EP0469264A2] 2.1 The intention is to provide a film finishing device which can be produced in an inexpensive and environmentally friendly way by saving on material used for the cover layers protecting the film strip and for the adhesive strips. <??>2.2 The film finishing device according to the invention has a cover layer (13) of plastic sheet only on one side of the film strip (10). The film strip (11) is joined to the reorder strip (12) and the cover layer (13) by a single adhesive strip (14), which covers the associated edge regions. <??>2.3 Once the exposed film has been developed in the laboratory, the film finishing device according to the invention is prepared and returned to the amateur photographer to keep. <IMAGE>
