Abstract (en)

[origin: EP0469265A2] Drainage for a pavement which is for example bordered at the side by a kerbstone, comprising an upper water-permeable drainage layer, below that a barrier layer, and base layers arranged below the barrier layer, with a lateral strip of water-permeable material along the kerbstone underneath which extends a foundation, and with a duct which adjoins the strip and leads to a water discharge, the water-permeable strip being formed by an edge section of the drainage layer and the duct being formed by channel elements which are let into the foundation, said elements being arranged on the edge section by lateral openings oriented relative to the drainage layer and upper openings disposed at the level of the edge section.
