Abstract (en)  
[origin: US4889333A] A conveying apparatus for paper products in stream form having two parallel belt elements supported by rollers is made up of individual standardized self-contained prefabricated constructional elements which at least at a side lying in the product flow direction are couplable to a corresponding constructional unit in such a manner that only a single conveyor belt pair is provided which is supported by rollers or rolls and driven by a single drive unit, and at least one constructional unit is constructed for a deflection and/or turning of the product stream.

Abstract (de)  
Für einen Produktstrom von Papierprodukten in Schuppenform mit einem die Papierprodukte einspannenden Förderbandpaar (110,111) und jeweils davon getrennten Rollen- bzw. Walzenführungen (122,123,134) für die beiden zurücklaufenden Förderbänder ist im Wendebereich eine gebogene Halteplatte (112) für die Rollen- bzw. Walzenpaare (114,133) angeordnet. <IMAGE>
