Abstract (en)
[origin: EP0471943A1] A multipin, coded, preferably three-pin apparatus plug connection having electric-shock protection sleeves which are integrally formed on the housings and project beyond the pins and female contacts, the electric-shock protection sleeves, which surround the female contacts, being capable of being pushed into the electric-shock protection sleeves which surround the pins at a distance, the electric-shock protection sleeves surrounding the female contacts closely such that the electric-shock protection sleeves of the female contacts are tapered at the front in the overhanging region beyond the female contacts to the external diameter of the pin contacts and such that the external contour of the electric-shock protection sleeves of the female contacts corresponds in a positively locking and precisely fitting manner to the internal contour of the electric-shock protection sleeves of the pin contacts. <IMAGE>
