Abstract (en)

Disclosed is a sinker channel (11) on the needle cylinder (1) of a double knit machine, which defines therein a lower space (112) at width suitable for the insertion therein of a sinker and an upper space at width suitable for the insertion therein of a sinker (2) and the cast off loops (3), permitting the fabric formed to be firmly attached to the upper edge of the sinker channel at level equal to the middle notch of a sinker (2) so as to eliminate the use of any auxiliary means to hold the cast off loops (3).
