Abstract (en)

[origin: EP0473568A1] Railway coach (3, 4) for passenger traffic, having arranged at the end sides (1, 2) parts of an intercommunicating passage which forms together with the part of a further coupled-on railway coach (3, 4) a sealed intercommunication passage, a multi-component intercommunicating gangway (17) is provided, which can be walked on and which is surrounded by a membrane (7, 8), a folding bellows or the like, forming a space for the persons stepping through. The intercommunicating gangway (17) has flaps which are mounted so as to swivel about an axis parallel to the axle of the wheels of the railway coach, a ramp (18, 19) being mounted on the end side (1, 2) of the coach so as to swivel about an axis (22) which is arranged parallel to the axles of the wheels of the railway coach (3, 4), the ramp (9, 10) being held in its two limit positions with respect to the intercommunicating gangway (17) or the end side (1, 2) of the railway coach by means of a spring element (24). <IMAGE>
