Abstract (en)
[origin: EP0473571A2] A spray booth for varnish has outer walls (4) made of metal or water-tight and gas-tight plastic and a lining (3) made of plastic with an open pore structure. The lining (3) is connected to connections (1, 2) for water and for compressed air. In order to clean the booth, initially water and then compressed air is fed into the lining (3) via the connections (1, 2). <IMAGE>
