Abstract (en)

A multi-functional police baton comprising a baton main body (1) having a gripping portion (A) at one end in the longitudinal direction, an attachment (3) having a ring-like insertion portion (4) through which the baton main body is inserted and which is detachably fit to a base end position of the gripping portion (A) and an extended portion extended sideways from the insertion portion, and a coupling device of a male and female paired structure (7, 8) comprising a latch means of a movable structure for inhibiting the axial movement and means for engagement with the latch means, in which one of the means of the coupling means is disposed to the baton main body, while the other of the means of the coupling means is disposed to the insertion portion of the attachment. The extended portion of the attachment can be optionally selected from various kinds of forms, depending on which the functions of the police baton can be varied. <IMAGE>
