Abstract (en)

A headlight (1) in which an outer casing (2) is provided with a labyrinth drainage (22) formed by a duct (11) communicating on one side with the casing (2) and engaged, on the other side, by a labyrinth cap (14), the cap (14) being jointly stamped with the outer casing (2) and being connected thereto by a flexible member forming a virtual hinge (17) which allows this cap (14) to rotate between a jointly stamped open position and a closed operating position in which the cap (14) is snap-locked to the outer casing (2). <IMAGE>
