Abstract (en)  
[origin: WO9115556A1] The invention relates to a liquid crystalline medium based on a mixture of polar compounds with positive dielectric anisotropy which contains one or more compounds of general formula (I), where R is alkyl, oxaalkyl, fluoroalkyl or alkenyl with up to 7 C atoms and L, H or F.

Abstract (fr)  
L'invention concerne un milieu de cristaux liquides à base d'un mélange de composés polaires à anisotropie diélectrique positive, caractérisé en ce qu'il contient un ou plusieurs composés de formule générale (I), où R est alkyle, oxaalkyle, fluoroalkyle ou alcényle avec respectivement jusqu'à 7 atomes de C, et L, H ou F.
