Abstract (en)  
[origin: EP0474961A1] The invention relates to a work table with a table top, in particular a corner table top (1), and with a horizontal cable duct (2) which is arranged on the front side below the table top and can be moved from a closed position, in which a receiving rail (3) which is essentially U-shaped in cross-section and is open at the top is covered by the table top, into an opened position, in which the receiving rail is accessible from above. In order that the cable duct is readily accessible both in the case of corner table tops and when the work table is located with its front side relatively close to a wall, provision is made for the receiving rail to be movable downwards essentially without twisting relative to the table top and preferably also forwards to move it from the closed position into the opened position. <IMAGE>
