Abstract (en)
[origin: JPH04256664A] PURPOSE: To provide a paper inseting machine which can be moved along an endless conveying path and has pockets arranged at regular intervals, for accommodating printed products, and which can automatically adapt all pockets to variation in the height of the printed, products by adjusting operation of one time. CONSTITUTION: In order to attain the above-mentioned purpose, a paper inseting machine has at least one height adjustable stopping means which is coupled with a pocket in a self-sustaining condition so that the pockets stop their printed products, and an adjustable stationary adjusting means secondarily coupled with the stopping means so as to be operative for adjusting the height of the stopping means when the pockets are moved along the endless conveying path.
