Abstract (en)

[origin: WO9115874A1] A variety of integrally combined field emission devices (104) and non-field emission control and/or controlled devices (101), such as field effect transistors (201) and bipolar transistors (101). Various embodiments of field emission devices (104) are accommodated, including those having substantially planar oriented electrodes, non-planar structures having cone shaped emitters (107), and inverted emitter structures.
