Abstract (en)

[origin: EP0476425A1] Analog time-piece in which the hands are in a specific position, for example superposed at 12 o'clock, in order to mark a pre-determined temporal reference, for example midday. This time-piece comprises an adjustment means for modifying the position of the temporal reference relative to the dial. Thus, for example, by positioning the temporal reference at 6 o'clock, a wristwatch intended to be worn on the left wrist is converted into a wristwatch intended to be worn on the right wrist. <IMAGE>
