Abstract (en)

[origin: EP0477006A1] An electrical cable assembly includes a plurality of round electrical conductors. One of the conductors (20) is flattened along a longitudinal surface portion (21). The conductors are arranged in side-by-side transversely spaced position with the flattened portion (21) of the one conductor (20) facing an adjacent conductor (20). An insulative casing (24) is extruded about the conductors and includes a major planar surface (26) permitting mass termination to a connector. The one conductor (20) includes a curved surface (23) portion which faces the major planar surface (26). <IMAGE>
