Abstract (en)
[origin: EP0477068A2] Exhaust system for building facades, comprising a chassis made of two main parts, a frame and a leaf, the latter being provided with means ensuring its rapid opening, this device being characterised in that the systems for control (14), for ejection (20), for damping and for balancing and for reclosing the leaf are integrated into the frame of the chassis, the latter serving as covering for all these systems. <IMAGE>
