Abstract (en)

[origin: WO9015813A1] The invention relates to oligonucleotide or oligodeoxynucleotide compounds with an alpha anomer structure and to their therapeutic applications. These compounds are used to inhibit RNA virus replication, in particular the alpha oligonucleotide d' 5'(ACCGCGGGCTTGTCCCTG)?3' is used to inhibit the replication of AIDS virus HIV.

Abstract (fr)

L'invention concerne une application des composés oligonucléotidiques ou oligodésoxynucléotidiques à configuration anomérique alpha et leur application thérapeutique. Ces composés sont utilisés pour l'inhibition de la réplication des virus à ARN, plus particulièrement on utilise l'oligonucléotide alpha d'5'(ACCGCGGGCTTGTCCCTG)3' à l'inhibition de la réplication du virus VIH du SIDA.
