Abstract (en)
[origin: WO9015761A1] A device for distributing packaging material comprises a plurality of bags and a bag retainer hoop adapted to be fastened in a packaging machine and fix a predetermined number of the bags. In transport position, a box blank forms a torsionally rigid and self-supporting transport container (22) at least partly enclosing the bag retainer hoop and the bags and having a bottom (24), which supports the bags and the hoop, as well as side and top panels (26, 28, 30, 32, 34, 36, 38, 40), which at least partly enclose the bags and the retainer hoop, the top panels (34, 36, 38, 40) being interconnected.
