Abstract (en)

[origin: WO9115223A1] Respiratory burst suppression factors are polypeptides having the ability to inhibit phagocyte activation or to reverse pre-existent activation of phagocytes. Methods for the preparation of these factors from cell culture medium are disclosed. Also disclosed are methods and compositions for the treatment of wounds, inflammatory disorders, and immune disorders using these factors.

Abstract (fr)

Les facteurs d'inhibition des bouffées respiratoires sont des polypeptides aptes à inhiber l'activation des phagocytes ou d'inverser une activation de phagocytes déjà existante. On décrit des procédés de préparation de ces facteurs à partir d'un milieu de culture de cellules, ainsi que des procédés et des compositions servant au traitement des plaies, des troubles inflammatoires et des désordres immunitaires à l'aide de ces facteurs.
