Abstract (en)

[origin: EP0477401A1] The cassette has the form of a flat package and serves for storing elongated objects (1), in particular tools, such as twist drills, screw taps, saw blades and the like. It has a cassette bottom part (2) consisting of a base part (3) and at least three side parts (4, 5) adjoining it at the edges and a lid part (6) which is mounted so as to be swivellable on said bottom part. The lid part (6) is held in a closed position on the cassette bottom part (2) by a separable securing member (7). When the cassette is closed, the lid part (6) is surrounded at the edges by the side parts (4, 5), said side parts (4, 5) projecting with their upper free edge (4.1) over the outside surface of the lid part (6). Provided on the lid part (6) is at least one gripping strip (8) which projects laterally in a plane parallel to the surface of the lid part (6).
