Abstract (en)

[origin: EP0477411A1] A remote control system for wide areas which operates with transmitters (1) and decoders (2) in receivers (3), by which actuators (4) are switched, for which purpose the transmitters (1) output messages. It is provided that two or more decoders (2) are connected to one another by a line (6) and operate with collision detection when accessing this line (6), and that the messages contain coding features for the switching state "on", "off". <IMAGE>
