Abstract (en)
[origin: EP0477588A2] Fluid reservoir (1) which can be detachably fixed to an apparatus (12) and has a removal opening (2) for connection to a removal coupling (13) of the apparatus (12), it being provided according to the invention that the reservoir (1) is provided below the removal opening (2) on two opposite sides with in each case one guide path (3) which has an incline which is positive with respect to the removal opening (2), that in each case a fixed guide pin (4A) of the apparatus (12) is pressed the removal opening (2)[sic] against the removal coupling (13) via the guide path (3) when the reservoir (1) is detachably fixed, in which case a device (5) is provided for securing the reservoir (1). <IMAGE>
