Abstract (en)
[origin: EP0477790A1] This scalp massaging device consists of a helmet (1) equipped with three first fixed points of contact (5) with the scalp of the user which are situated near the top of the helmet. It moreover comprises three second points of contact (8), one in the frontal zone of the helmet and the others in the parieto-temporal zones of the latter, these second points of contact comprising means (17, 18) making it possible to apply it to the scalp with a specific and adjustable pressure. Finally, the helmet moreover has an eccentric (26) driven in rotation by a motor. <IMAGE>
