Abstract (en)

[origin: WO9012502A1] A novel arthropodically-active composition-of-matter is disclosed. Such an arthropodically-active composition-of-matter comprises an aqueous lower alkanol solvent, a toxicant contained within the solvent, and an effective amount of an emulsifier, also contained within the solvent, for forming a foam matrix of predetermined stability. Also disclosed are methods for producing such a composition-of-matter.

Abstract (fr)

Une nouvelle composition de matière à activité arthropodicide comprend un alkanol inférieur aqueux solvant, un poison contenu dans le solvant et une quantité efficace d'un émulsifiant, également contenu dans le solvant, pour former une matrice alvéolaire ayant une stabilité prédéterminée. Procédés de production de cette composition de matière.
