Abstract (en)

The system is designed for use in the art field of construction and more especially in the erection of ventilated frontages, and provides a means by which to secure tiles (19) or other infill panels to the ventilated wall (1). Use is made of an assembly of easily installed elements matched in appearance to the tiles, which comprise an upright (3) affording longitudinal tracks (4, 5) and anchored to the wall (1) with angle brackets (6), and plates (14) by which the tiles (19) are supported at the four corners; the single tile is made secure by springs (16) and lugs (18) associated with the plates. <IMAGE>
