Abstract (en)
[origin: CA2051213A1] TANK CONTAINER A tank container includes a cylindrical tank having its one end connected to an end frame 14 by means of an end saddle structure 12. In the area of its other end, the tank 10 is connected to an end frame 13 by means of a saddle structure 11 in such a manner that the tank bottom 20' provided at this tank end projects through the end frame 13. The saddle structure 11 comprises three rings interconnected partly by welding and partly by screwing, with the innermost ring being welded to the cylindrical portion of the tank envelope.
