Abstract (en)

[origin: EP0480347A2] The present invention relates to a self-advancing automatic apparatus for the application of inserts with in-view positioning, which has the peculiarity of comprising an insert-holder head (1) which is associable with an outer skirt (3) which defines a chamber (4) in which a positioning piston (5) is sealingly movable; the positioning piston (5) supports a freely rotating tool (10) and interacts with an advancement piston (20). There are also telescopic means (26,27) for the connection of the tool (10) to an actuation unit (25) for the rotation of the tool (10). <IMAGE>
