Abstract (en)  
A plurality of single members coupled longitudinally, each comprising an external frame structure, comprised of two longitudinal structures (1, 6) connected to each other by upper crossmembers (2), upon which barrier interlace structures (11) are assembled, and in which barrier a frame (3, 4) internal to said external frame structure is provided, such as to create two air spaces (9) with said longitudinal structures (1, 6) and upon which an interlace structure (11) is outerly arranged; a presown biomat (13) being provided inside said external frame structure, and a nonwoven geotextile material mat (12) being provided outside said internal frame, and a filling material being provided in the two air spaces (9) between the external frame and the internal frame structures. <IMAGE>
