Abstract (en)

[origin: EP0481205A2] An equipment for transferring platforms (14,32), particularly for carrying motorcars, from a movable base (9) to fixed stands (12) and viceversa, in which the movable base (9) is provided with a frame (10) movable with respect to the base (9), while the fixed stands (12) consist of couples of parallel overlapped guides (30,31), each one of them designed for bearing one of the platforms (14,32). The movable frame (10) is fitted with a chain (16) that is wound around wheels (15) with horizontal axes at the opposite sides of the frame (10). The chain (16) lies in a vertical plane parallel with respect to the translation plane of the platforms (14,32) and is fitted with pins (17,18,19,20) for hooking respective seats (22,23,24 and 37,38,39) of the platforms (14,32). <IMAGE>
