Abstract (en)

There is disclosed a package and dispenser for a rolled, tape-like confectionery product. This dispenser includes a housing means which has top, bottom and side wall means. There is an opening in the side wall means adapted to allow an end of the confectionery product to pass through. The dispenser also includes a hinged means with a hinged end located on one side of the opening. Cutting means are provided on the other side of the opening for contacting and cutting the confectionery product. Locking means are also provided for locking the hinged means in a closed position covering the opening. <IMAGE>
