Abstract (en)
[origin: EP0481840A1] The invention relates to a helicopter landing pad which is easy to transport and to manipulate. It is particularly useful for landing on unconsolidated (movable) ground (desert, dusty ground, snow). It comprises a textile cover-sheet (1) placed on the ground (2). This cover-sheet has eyelets (3) located at its periphery. Stakes (pegs) (4) are driven into the ground (2), traverse the eyelets, and fasten the cover-sheet (1) to the ground (2). <IMAGE>
