Abstract (en)

On a chassis (3) electromechanical components are fit with the purpose of sucking the air in the atmosphere to heat it or not according to the electric resistances (6) and blowing said air, in more or less volume, on the user's sole through the drilled grill (7) with the purpose of drying and sterilizing feet. The device is put into operation slightly touching the ergonomic switch (8) and the temperature of the blown air shall be selected using the temperature selection and speed engine switches (9) (4). <IMAGE>
