Abstract (en)
[origin: EP0481957A2] The invention relates to a traffic light signalling device in which the traffic flow is regulated by different lamps, each of the lamps being formed by a multiplicity of individual lights, which are arranged in a matrix and together produce a prescribed geometrical shape, and it being possible for the individual lights 2, 3, 4, arranged in a matrix, of each lamp to have current applied to them in a system-specific fashion in the form of a light curtain. <IMAGE>
