Abstract (en)
[origin: WO9115304A1] A masking material for protecting bored parts of a member from surface treatment or the like. It is composed of a plurality of plug-like pieces connected to each other in line through parts to be bent for picking off, in which the minimum diameter of a part to be picked off is set to 1/10 to 9/10 of the maximum diameter of said plug-like piece so that each piece can easily be bent and picked off at a correct position.
