Abstract (en)
[origin: EP0482510A1] The invention relates to a coke oven door (1) having an elastic sealing membrane (2) which is fixed to the door body, preferably to be displaceable in the longitudinal direction of the oven, and whose free leg carries the spring-loaded sealing element (13) resting all round on the door frame, the sealing element being pressed against the door frame by leaf springs adjustably fixed to the door body in the longitudinal direction of the oven, according to the parent patent P 3,913,247. According to the invention, the leaf spring (8, 8a) fixed to the clamping plate (4) should consist of a planar, optionally pre-bent, flat spring.
