Abstract (en)

The reel (1) is mounted in the yarn accumulator (2) with an upward slant and comprises a guide ring (6) which is freely mounted around the longitudinal rods (3) of the reel (1) and which serves to guide the yards wound off the reel, on which guide ring (6) several conically fastened detensioners (7) are provided where the ends which are fastened to the guide ring protrude beyond the circumference of the reel (1) and where the other ends are located inside the reel, and where several guide rails (9) are mounted in the reel parallel to the longitudinal rods of the reel, and guides (10) are provided on said guide ring (6) and yarn tensioners (7) which guides are intended for the movement in the longitudinal direction over the reel (1) and along the guide rails (9) of the guide ring (6) with yarn tensioners (7). <IMAGE>
