Abstract (en)

[origin: EP0483726A1] The present invention relates to a tubular belt woven in one piece and having a soft interlining, especially a saddle belt or carrying belt. According to the invention, the interlining (3) is likewise woven in one piece together with the tube (1, 2), in such a way that a common weft yarn (4) runs cyclically and successively through one tube half (1), at least once through the interlining (3) and through the second tube half (2).
